

LOOKING FOR A UNIQUE SPACE?

bbdesigns.uk

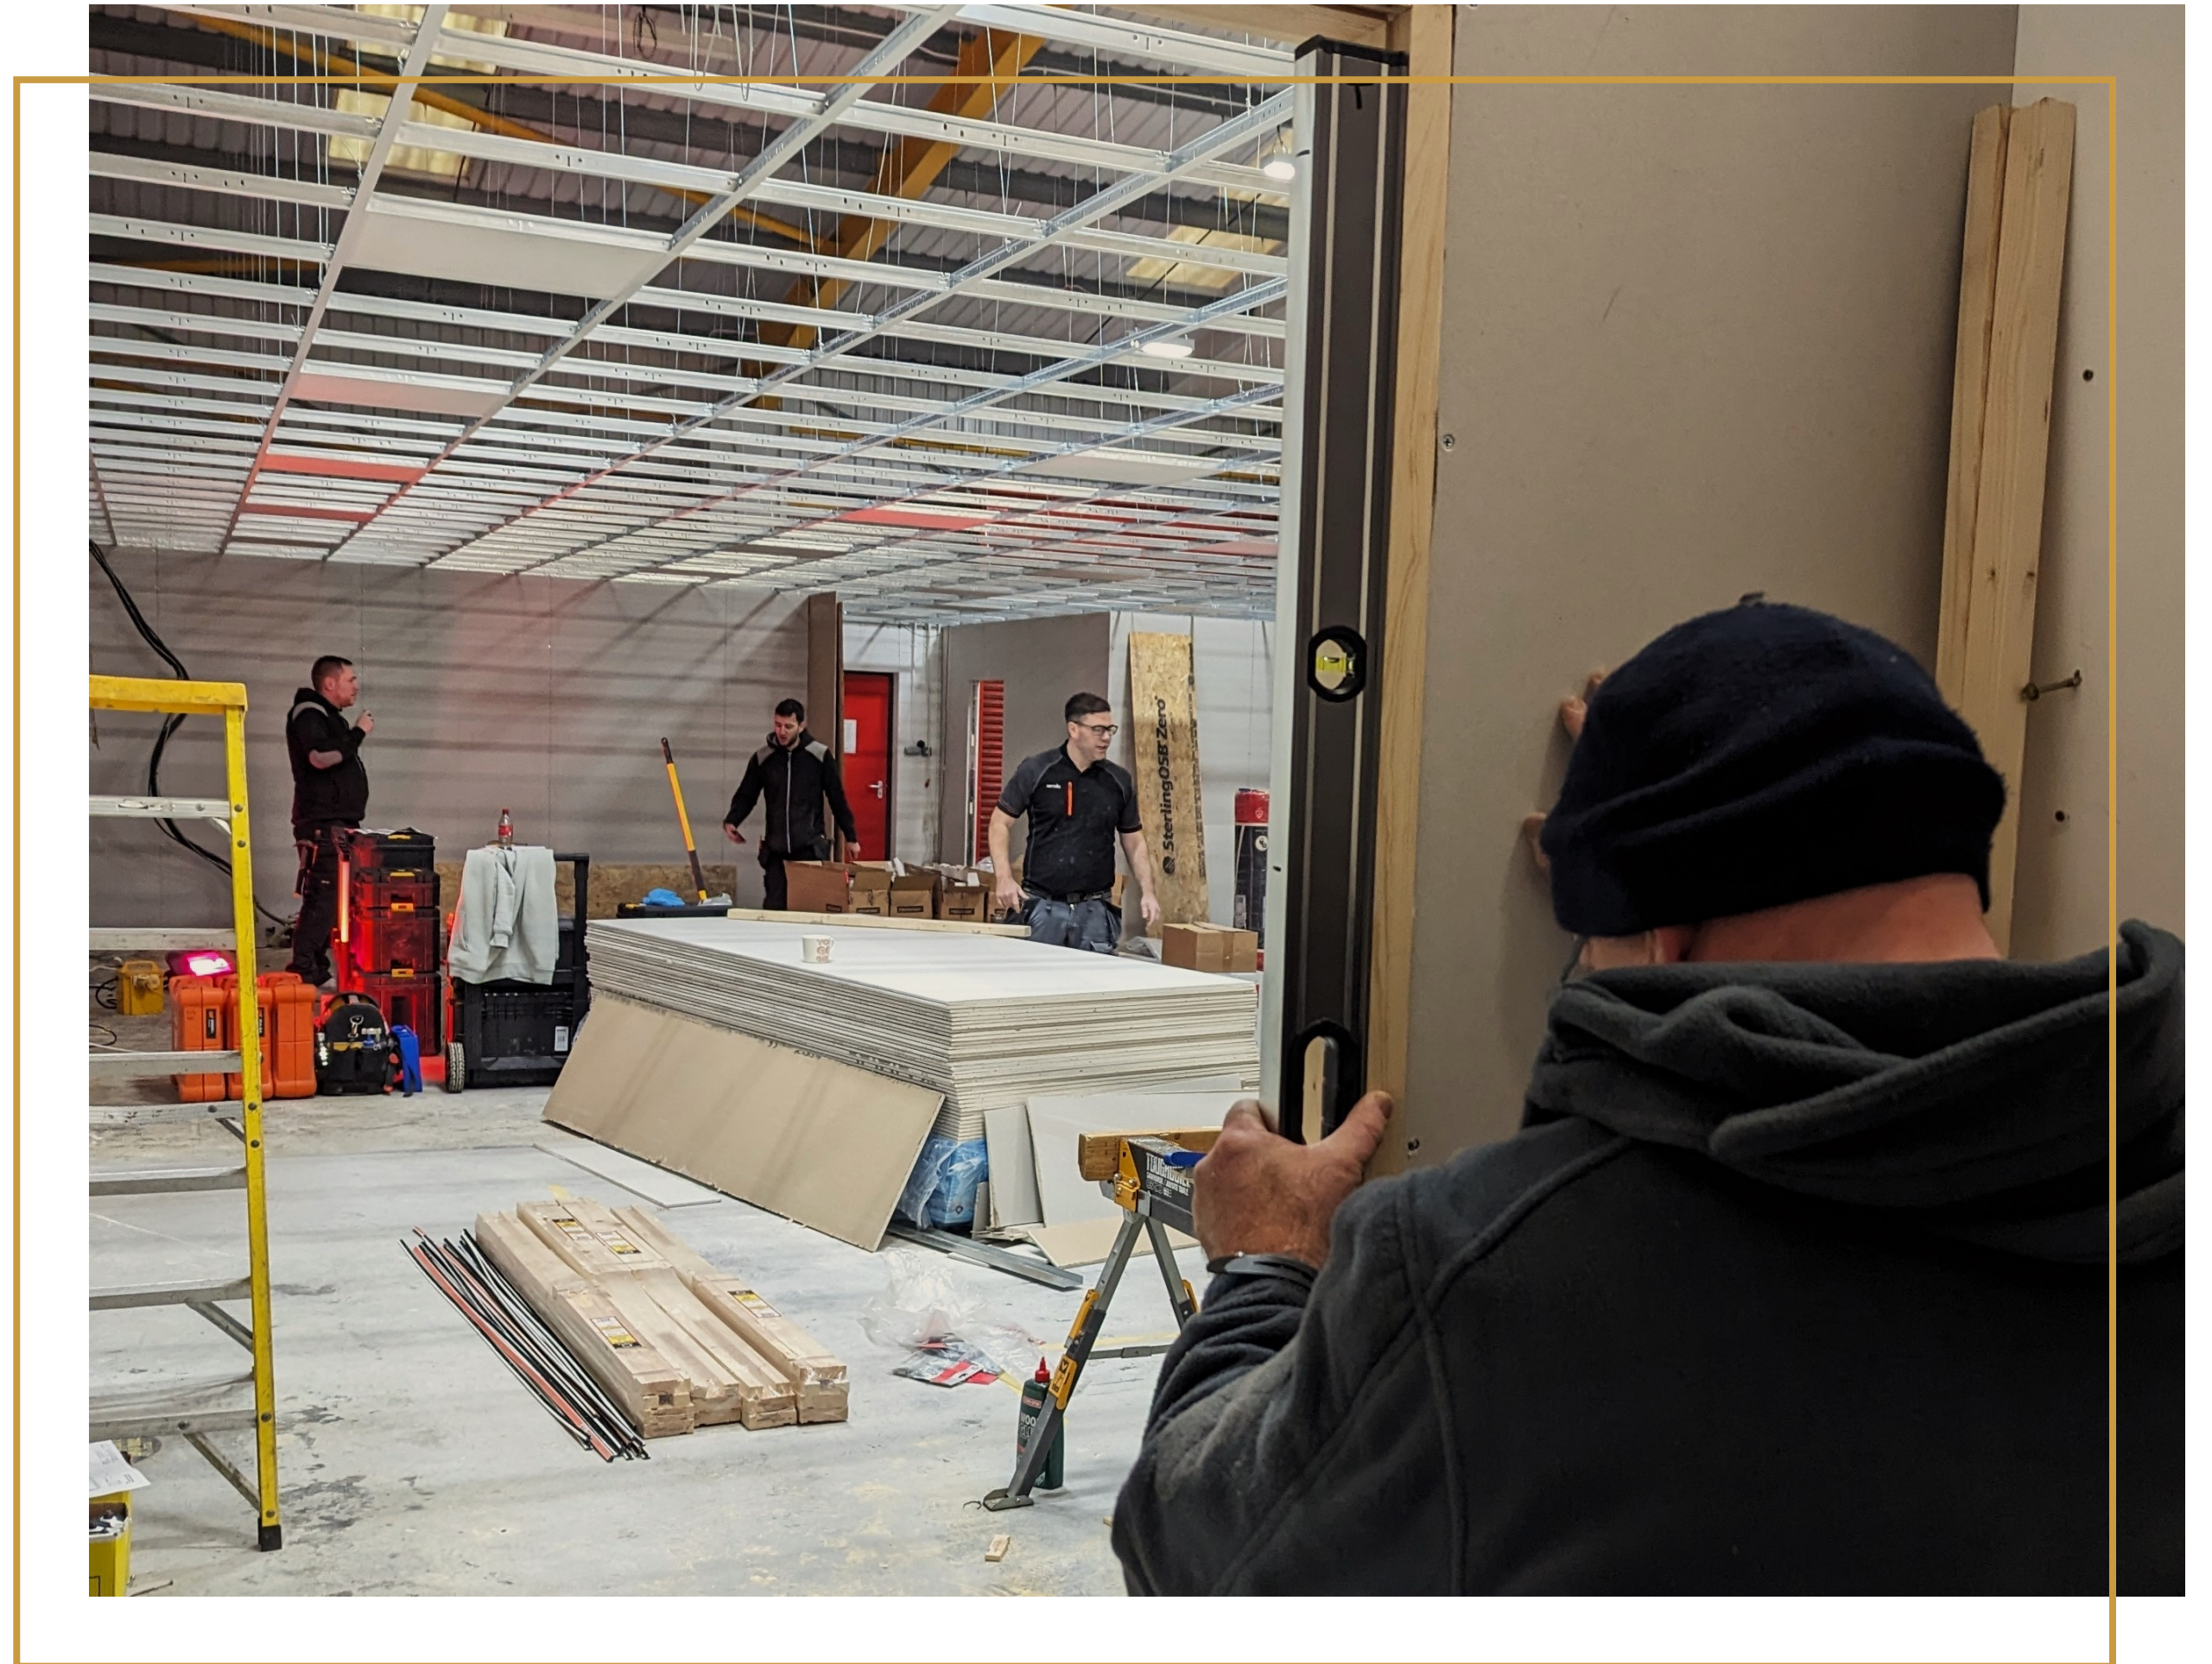

SUSTAINABILITY AND CIRCULARITY ARE ESSENTIAL TO FUTUREPROOFING YOUR BUSINESS

At BB designs we innovate spaces utilising zero carbon reclaimed materials and non-toxic finishes. We bring creative design and wellbeing to the workplace through our user centric design thinking, promoting productivity and better mental health.

Our team, with over 20 years of design experience, create solutions to enhance your business productivity, promote creativity, and lower your carbon footprint in the process.

The meticulous selection of materials, furnishings and design practices minimise environmental impact, with sustainability at our core, we can transform your commercial space.

HOW WE DO THINGS:

Use of Sustainable Materials:

To create a positive and productive space whether in retail, hospitality, or a workspace, BB Designs offer materials that are renewable, recycled or sustainably sourced.

Positive Wellbeing:

Transform your workplace with a sustainable option that boosts employee well-being. Research shows that thoughtfully designed workplaces can increase productivity by 20%. Key factors include optimised layouts, natural light, and ergonomic furniture. (Source: American Psychological Association).

Offices incorporating flexible workspaces see a 30% increase in team collaboration and creativity, directly impacting outcomes. (Source: Steelcase Global Report)

Waste Reduction – Landfill Prevention:

The Take Back Scheme we provide for our clients not only creates a personalised experience due to bespoke furnishings but also minimises waste at every stage. We utilise reclaimed materials to create modular designs which are adaptable to changing spaces, ensuring your investment adapts as you grow.

Flexible and Adaptive Spaces:

Our interiors and furnishings are created using the methodology of Design for Disassembly (DfD). Modular solutions can easily adapt to changing needs and transform as you require, during business growth. The Relocation services we offer reduces the complexity of future renovations and extra resources, therefore will ensure that your investment moves with your business. Choosing us will save you money long term.

Carbon reporting and Net Zero

As new regulations and sustainability targets come into force, now is a great time to invest in a sustainable interior. BB Designs ensure compliance with recognised standards at the forefront of sustainable design and build to bring confidence to our clients.

Each project delivered will be supplied with a BB Designs Sustainability Report to allow the interior fit out to be tracked and logged for individual materials, carbon saved by using us, and circularity information.

Our take-back scheme provides the bridge between clients and their recycling needs, promoting sustainability at every stage.

The scheme works with products designed by us, emphasising our flexibility to create truly unique pieces that stand out in your space, time and time again.

Furniture can be modified and repurposed to suit the changes you may face along your business journey. All the materials used in our products including reclaimed wood, metal, and fabric can all be recycled or upcycled through our processes, keeping in line with our circular design principles.

The realisation of your circular fit-out begins at consultation, we provide 3D and 2D design to successfully communicate layout possibilities and interior design development, ensuring the space meets your business needs.

THE PROCESS

WE GROW WITH YOU!

If you need to adapt your layout and furniture in the future, it's our promise to redefine and service what we designed for you, if you simply want to get rid, we can take back our supplied products and reclaim these to use in future projects.

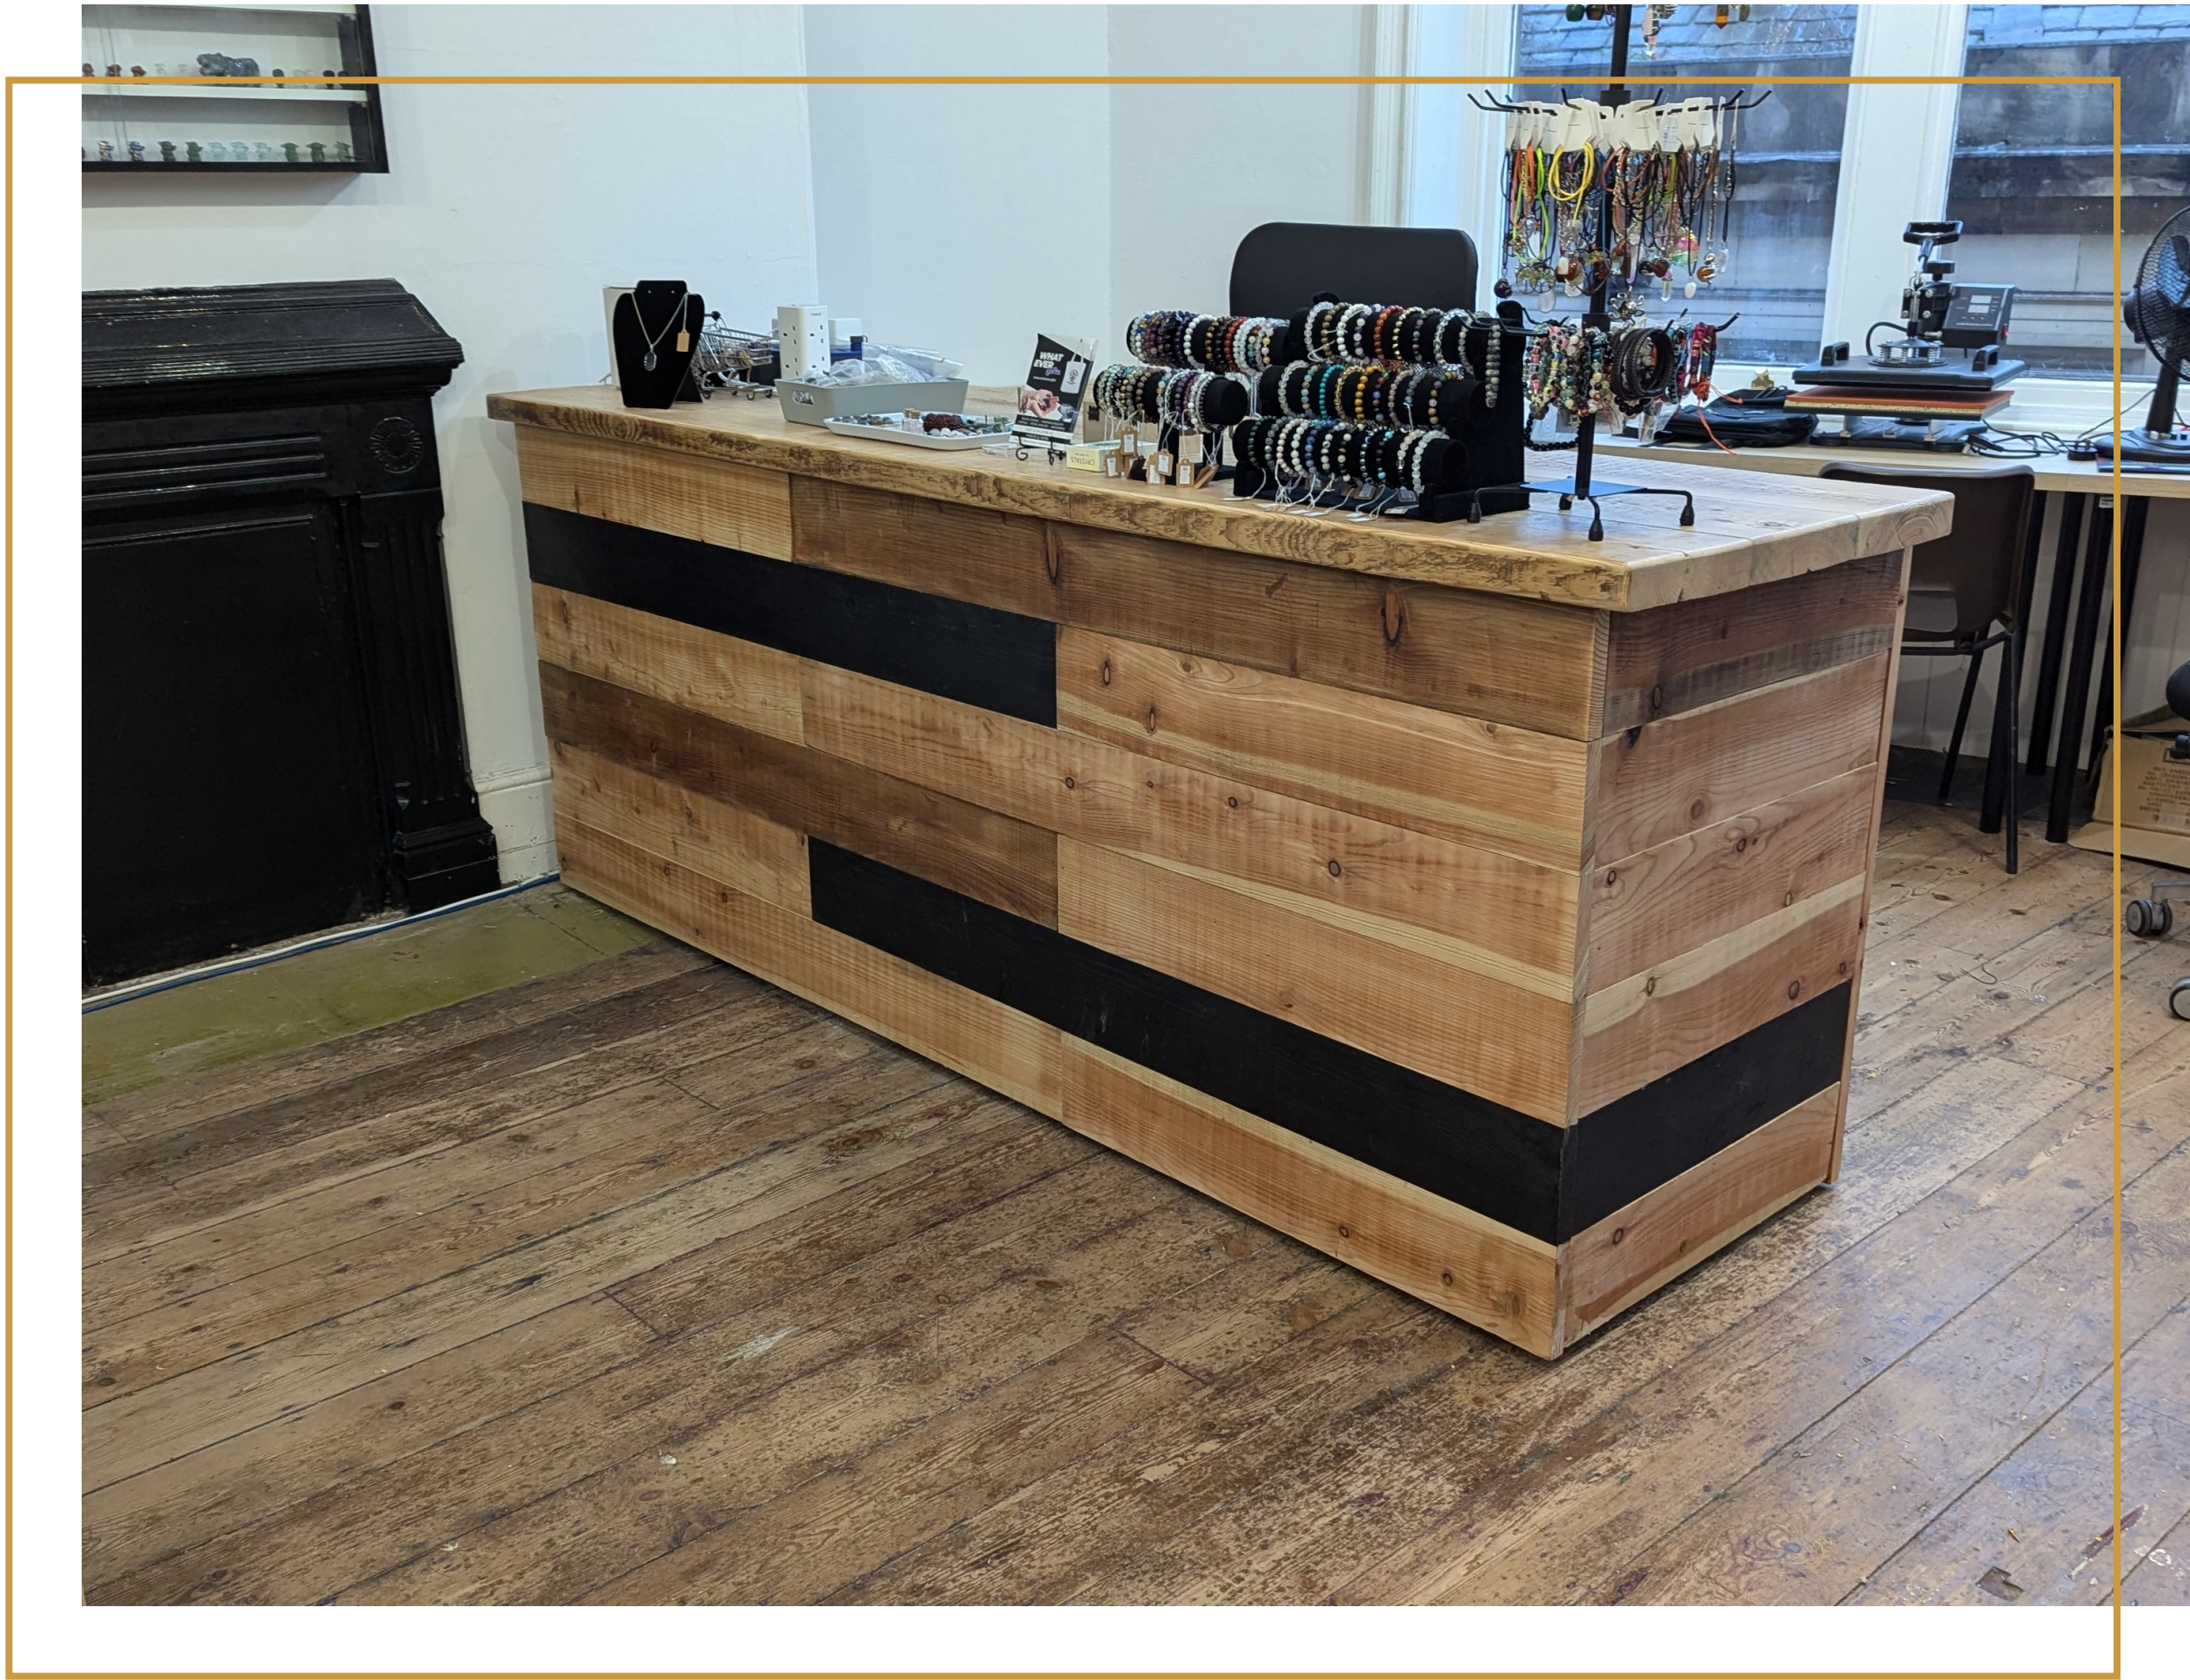

Through this process waste is diverted from landfill and the need for new raw materials is reduced, our sustainable edge is your sustainable edge.

At BB Designs we make eco-friendly choices to encourage clients to embrace more sustainable options, with the integration of our take-back scheme making it even more accessible.

Every project receives a carbon certificate, so you can see the positive impact you are making by choosing us. We are pushing towards greater transparency and a greener future, so can you.

OTHER FIT OUT

For us, sustainability is not just a trend but a movement that embodies our mission as interior designers to redefine traditional practices. From our base in West Yorkshire every project prioritises sustainability to craft spaces for B2B clients serving offices, retail, and public spaces, alongside the hospitality sector.

SO, HOW CAN WE HELP YOU?

Our flexibility as designers means we work entirely around you. From bespoke upcycled furniture pieces, to full scale sustainable fit outs these design choices can reshape how you live and work. Creating a space that supports our planet while enhancing productivity is a process, BB Designs is here to guide you along the way.

Client consultation, discovery call

To get started, we offer a free 30-minute discovery consultation where we will listen to your needs and explore the best options for your unique space. Together, we will find the perfect solution to create a space you love—one that feels as good as it looks.

Site visit, layout and concept development workshop

Lets talk about your vision, generate ideas and present forward thinking concepts. Whether it's a retrofit, or a completely new space. With expertise in technical layout, ergonomics, and commercial functionality, your space will become an efficient workplace for your team to thrive.

2D and 3D design services

2D & 3D visuals and CGI renders are included in the package, enhancing your ideas to give you a true sense of the design, layout, and materials. The 3D renders we offer strengthen our communication with clients to offer a personalised service.

Manufacture and installation

Once you are happy with the final designs we can get straight to work supplying, manufacturing and installing your fresh interior. Including the upcycling of your existing assets to continue the circularity of your space.

Contact
