BBDESIGNS

OUR STORY

WHERE IT ALL STARTED

BB Designs was born in 2022 from a desire to build better, for people and for the planet. What began in home basement has evolved into a studio known for its craftsmanship, creativity, and commitment to sustainable solutions in commercial design.

We believe that great spaces start with great values. Every piece we produce is made with intention, crafted to last, and designed to make a difference.

OUR SUSTAINABILITY MISSION

SUSTAINABILITY IS OUR FOUNDATION.

We specialise in circular design, reclaiming, repurposing, and reimagining materials to reduce waste and celebrate natural character.

Our work prioritises:

Reclaiming existing interior assets, transforming them into new products

Reclaimed & low-impact materials in all of our products

Design, manufacture, and delivery

Long-lasting design principles within a circular system

Transparent sourcing & responsible supply chains

Manufactured in sheet materials and comes with wood turned dowels ideal for shoe, lingerie or accessory hanging.	OPT 1 – 100% Recycled Solid Surface OPT 2 – Plywood with coloured finish

MATERIALS

WHAT DO WE USE?

Our designs utilise the most sustainable materials available, blending performance with aesthetics that align with our circular design principles. We repurpose reclaimed materials, actively diverting waste from landfill while delivering a measurable return on investment through our closed-loop system.

RECLAIMED & RESPONSIBLY SOURCED WOOD

Reduces landfill waste, adds character, and supports circular reuse.

MILD STEEL

Durable, endlessly reusable, ideal for modular and reconfigurable designs.

POLYGOOD

Made from post-consumer plastics, turning waste into vibrant, long-lasting solid surfaces.

PAPERSTONE

Crafted from recycled paper and bio-resin, offering a durable, low-impact alternative to stone.

PLYWOOD & KAVA SURFACES

Crafted from recycled coffee grounds and organic fibres, FSC-certified plywood a durable, versatile core material that offers strength and stability.

CAMIRA FABRICS (REPLAY)

Our Upholstered products use a 100% recycled, flame-retardant performance textile bringing resilient colour and low-carbon style to your interior.

WATER-BASED FINISHES

Low VOC, non-toxic, and environmentally safer than solvent-based coatings.

RE-USABLE COMPONENTS

Designed for disassembly and reuse across multiple projects.

TruCO2™ – Circular Transparency, Built In Track. Trust. Transform.

TruCO2™ is our live carbon passporting and material tracking system, created to make sustainability measurable, visible, and actionable. Every product we design and build is issued a TruCO2™ passport via QR code, laser-etched directly onto the piece.

Scan it, and you'll see exactly what it's made from, where the materials came from, and its verified embodied carbon data.

This means every interior we deliver comes with complete transparency, and the data you need to track Scope 1–3 emissions with confidence.

How it Works

Design & Build – We create using reclaimed, low-carbon, and modular materials designed for disassembly.

Passport & QR – Each piece receives its own TruCO2™ product passport, containing material origin, carbon footprint, and disassembly instructions.

Track & Report – Clients can access real-time carbon data and integrate it into ESG and sustainability reporting.

Takeback Loop™ – When change is needed, we reclaim, redesign, and rebuild, keeping the same materials in circulation.

Why It Matters

Verified Scope 3 visibility – Quantifiable data for supply-chain emissions reporting

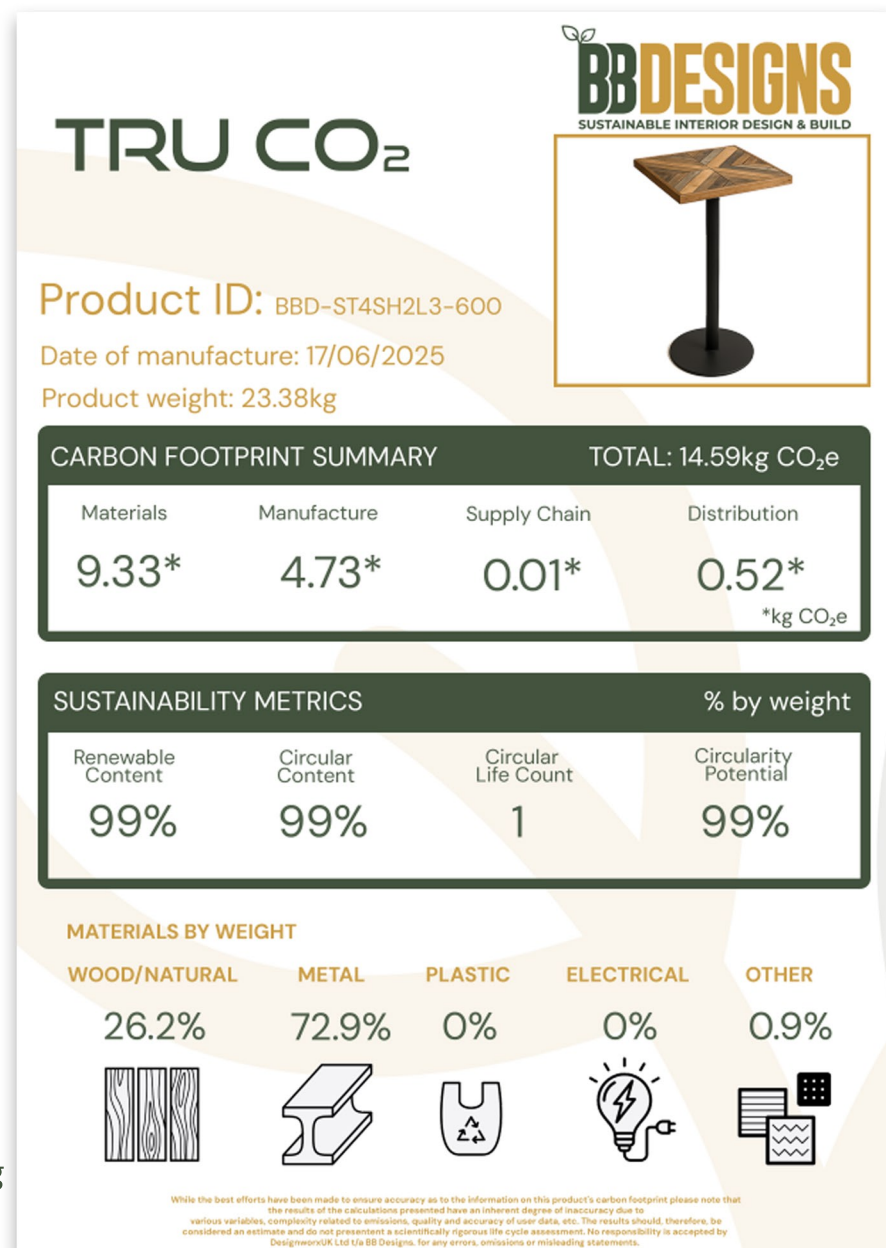

Proof of circular design – Measurable reuse, zero waste

Future-ready interiors – Built for reconfiguration, not replacement

Transparency at your fingertips – QR-linked data for every product, every project

Innovate UK backed – TruCO2™ was developed through an Innovate UK-backed research project.

Every space should tell a sustainability story backed by evidence, not claims. TruCO2™ makes that possible.

Require a bespoke service?

Our bespoke project service offers a complete journey from concept to completion. We work with you to define your concepts, support with layout planning and provide bespoke furniture design services tailored to your specification.

Products are crafted in-house using reclaimed and eco-friendly materials, ensuring quality, character and minimal environmental impact. Our skilled team of manufactures and installs with precision and care, delivering a seamless transformation that reflects your brand and values.

Bespoke Furniture Design

From concept to creation, we design and build furniture that reflects your space, story, and sustainability goals. Each piece is handcrafted from reclaimed or low-carbon materials, tracked through our TruCO₂™ passport, and designed for disassembly, built to evolve with you and reduce waste via our TakebackLoop.

2D and 3D Design Services

2D & 3D visuals are a key part of our design process. For custom furniture pieces we enhance your ideas to give you a true sense of the design through visual renders, drawings and models.

Circular consultancy & Design

Turn existing assets into new opportunities. Our consultancy helps you assess, repurpose and redesign existing furniture and materials into high quality, bespoke products for new interior schemes. This reduces waste, retains material value, lowers the demand for new resources and improves the overall sustainability of the project.

Manufacture and Installation

Once you are happy with the final design we can get straight to work supplying, manufacturing and installing your bespoke furniture. Including the upcycling of your existing assets to continue the circularity of your space

Contact

Check out our website and social media channels to see our services in action and discover the transformative impact we can have on your space.
